

STRUGGLING WITH SWEAT AND ODOR?

HYPERHIDROSIS ISN'T A CHOICE — BUT YOUR TREATMENT IS

When sweat and odor interfere with daily life, it may be time to look beyond topical solutions.

A CLINICALLY PROVEN SOLUTION

miraDry® is the only non-surgical, FDA-cleared treatment designed to permanently reduce underarm sweat, odor, and hair.

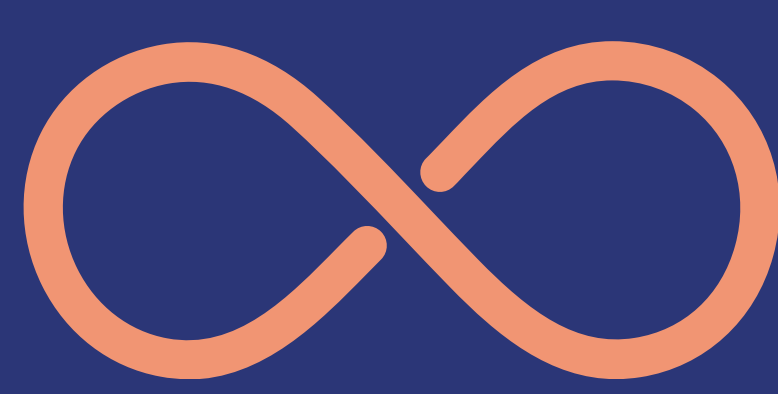

82%

Sweat Reduction at 12 Months^{1,2}

89%

No Longer Bothered by Odor at 24 Months^{1,2}

TO PERMANENTLY REDUCE UNDERARM SWEAT AND ODOR

Permanent

Immediate

Non-surgical

Ask your provider if miraDry® is right for you.

The miraDry system is FDA-cleared for the treatment of primary axillary hyperhidrosis (excessive underarm sweat) and the permanent removal of underarm hair. It also may reduce underarm odor.

You should not have the miraDry treatment if you have a heart pacemaker or other electronic device implant, need supplemental oxygen or have known resistance to or history of intolerance to local anesthesia including lidocaine and epinephrine. The most common side effects include swelling, discomfort or pain, redness, bruising, bumps and altered sensation in the treated area. Some side effects may last a few days to a few weeks. Others can last from one to several months following treatment. Patient results and experience may vary.
